

Increasing Opportunities for Transplant

Thursday, April 25, 2024 | 7:45 a.m. to 4:15 p.m.

Pines Manor, 2085 Lincoln Highway, Edison, NJ 08817

For Both Initial Certification and Re-certification for Nurses and Social Workers Contact Hours for Nurses, Social Workers, Patient Care Technicians and Dietitians.

This symposium is designed to provide the necessary knowledge and skills for healthcare professionals who wish to broaden their knowledge of renal and pancreas transplantation as a treatment modality for their CKD patients. It is specifically designed for dialysis nurses, patient care technicians, dialysis social workers and dietitians. The symposium will also provide initial and recertification for Transplant Surgeon Designees.

LEARNING OBJECTIVES

At the conclusion of the activity, participants will be able to:

- Review key initiatives the transplant center takes to improve patient care
- Identify two best practices to increase the number of patients listed for transplant at your facility
- Describe three responsibilities of the a transplant surgeon designee
- List two options for patients with living kidney donors
- Identify two considerations in the psychosocial evaluation of transplant recipients
- Describe two factors the transplant center considers in the evaluation of deceased donor kidney offers
- Describe one component of donor procurement
