MODERNA COVID-19 vaccines are incredibly effective at preventing death and hospitalizations. Is it time for you to boost your protection?

The updated bivalent COVID-19 boosters developed by Pfizer-BioNTech and Moderna include components of the original virus strain and the Omicron variant.

### PFIZER-BIONTECH

**Primary Series**
- 6 months to 4 years of age
  - 2 doses given 3 to 8 weeks apart
  - 1 additional dose in 8 weeks
- 5 to 11 years of age
  - 2 doses given 3 to 8 weeks apart
  - 1 monovalent booster in 5 months

**Bivalent Series**
- 12 years of age and older; 1 dose given 2 months after primary series

### NOVAVAX AND J&J

**Primary Series**
- Novavax: 18 years of age and older; 2 doses given 3 to 8 weeks apart
- Johnson & Johnson: 18 years of age and older; 1 dose

**Bivalent Series**
- 18 years of age and older; 1 dose of Pfizer-BioNTech or Moderna given 2 months after primary series

### MODERNA

**Primary Series**
- Individuals ages 6 months and older; 2 doses given 4 to 8 weeks apart

**Bivalent Series**
- 18 years of age and older; 1 dose given 2 months after primary series

### DID YOU KNOW? The bivalent booster you receive does not need to be from the same manufacturer as the one that made your primary vaccine or booster doses.
